Summary

Apple shares have outperformed the industry in the past six month. It is benefiting from strong growth in iPhone and Services revenues. AAPL continues to gain momentum in emerging markets India and Greater China reported strong fiscal first quarter growth driven by iPhone. The company now has more than 1 billion paid subscribers across its Services portfolio and 2.5 billion active devices. Expanding capabilities of AI Intelligence is noteworthy. Apple expects the March quarter's net sales to grow between 13% and 16% on a year-over-year basis despite constrained iPhone supply. Services are expected to grow at the fourth quarter of fiscal 2025 rate. However, gross margin is expected to be 48-49% in the second quarter of fiscal 2026. Increasing regulatory headwinds and stiff competition are major concerns for the iPhone-maker.

Overview

Apple's business primarily runs around its flagship iPhone. The Services portfolio that includes revenues from cloud services, App store, Apple Music, AppleCare, Apple Pay, and licensing and other services now contributes a significant part of revenues.

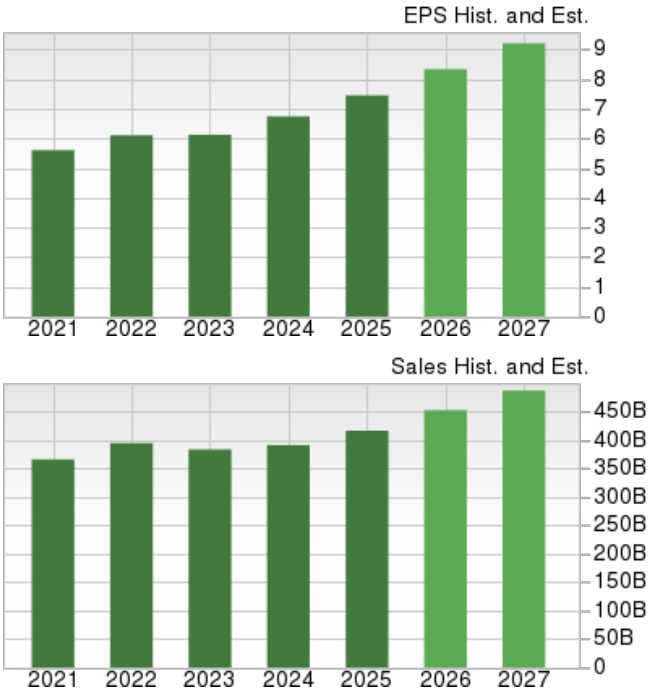
The non-iPhone devices like Apple Watch and AirPods continue to gain traction. In fact, Apple dominates the Wearables and Hearables markets due to the growing adoption of Watch and AirPods. Solid uptake of Apple Watch has helped Apple strengthen its presence in the personal health monitoring space.

Apple is expanding non-iPhone portfolio with the launch of Apple Vision Pro a spatial computer that blends digital content with the physical world.

Headquartered in Cupertino, CA, Apple also designs, manufactures and sells iPad, MacBook and HomePod. These devices are powered by software applications including iOS, macOS, watchOS and tvOS operating systems.

Apple's other services include subscription-based Apple News+, Apple Card, Apple Arcade, new Apple TV app, Apple TV channels and Apple TV+, a new subscription service.

In fiscal 2025, Apple generated $416.16 billion in total revenues. The company's flagship device iPhone accounted for 50.4% of total revenues. Services, Mac and iPad category contributed 26.2%, 8.1% and 6.7%, respectively. Wearables, Home and Accessories products category contributed 8.6%.



As of 02/02/2026

Apple primarily reports revenues on a geographic basis, namely the Americas (North & South America), Europe (European countries, India, Middle East and Africa), Greater China (China, Hong Kong & Taiwan), Japan and Rest of Asia Pacific (Australia & other Asian Countries).

In fiscal 2025, Americas, Europe, Greater China, Japan and Rest of Asia-Pacific accounted for 42.9%, 26.7%, 15.5%, 6.9% and 8.1% of total revenues, respectively.

Apple faces stiff competition from the likes of Samsung, Xiaomi, Oppo, Vivo, Google, Huawei and Motorola in the smartphone market. Lenovo, HP, Dell, Acer and Asus are its primary competitors in the PC market. Other notable competitors are Google & Amazon (smart speakers) and Fitbit & Xiaomi (wearables).

As of 02/02/2026

Reasons To Buy:

> Apple is benefiting from momentum in the Services business, strong adoption of Apple Pay and growing Wearables business.

- Apple's prospect rides on the success of Apple Intelligence. Since the launch of Apple Intelligence, Apple has introduced dozens of features, including writing tools and cleanup and made it available in 15 languages. Visual intelligence is helping users learn and do more with the content on their iPhone screen, making it faster to search, take action and answer questions across their apps. The collaboration with Google to develop the next generation of Apple foundation models bodes well for the iPhone's prospects. Addition of Apple Intelligence is driving iPhone active installed base grew to an all-time high in the first quarter of fiscal 2026. In the reported quarter, iPhone set a new all-time record for upgraders in aggregate and across many countries, including the U.S., China Mainland, Japan and India.

- Apple's Services business is expected to drive top-line growth in fiscal 2026 and beyond. Although Apple's business primarily revolves around its flagship iPhone, the Services portfolio has emerged as the company's new cash cow. The expanding content portfolio of Apple TV+, Apple Music, and Apple Arcade, as well as the growing user base of Apple Pay, has helped drive subscriber growth. In the first-quarter of fiscal 2026, Apple TV saw 36% increase in viewership thanks strong content. In 2025, Apple Music climbed to all-time highs in both listenership and new subscriber growth while Apple Pay eliminated more than $1 billion in fraud for Apple's partners last year.

- Apple Pay, designed on the basis of a contactless payment (NFC) technology, has been expanded to several markets. The growing adoption of contactless payment bodes well for the service. In California, driver's licenses and state IDs can now be added to Apple Wallet, enabling residents to seamlessly and securely add and present their IDs using iPhone or Apple Watch. This follows the recent launch in Hawaii and Ohio. Addition of ID to Apple Wallet is already available in Arizona, Colorado, Georgia, and Maryland. Montana, New Mexico, and West Virginia have signed on to adopt IDs in Wallet. Internationally, Japan has signed on to bring My Number Card to Wallet. Apple has expanded Tap to Pay on iPhone to more markets, including the U.A.E., Chile, Japan, Canada, Italy and Germany. Apple Pay is now available in countries like Egypt and Uruguay.

- Apple's focus on augmented reality/virtual reality (AR/VR) technologies presents growth opportunity in the long haul. The launch of Apple Vision Pro, a spatial computer that blends digital content with the physical world, is a positive step. To ramp up its efforts, Apple has acquired several smaller firms with expertise in AR hardware, 3D gaming and VR software. Apple's ARKit helps third-party developers to work on creating AR experiences for its iOS platform.

- Apple has a strong balance sheet and generates significant cash flow. As of Dec. 27, 2025, cash & marketable securities were $144.8 billion compared with term debt of $88.51 billion. Apple had cash & marketable securities worth $132.42 billion compared with term debt of $90.68 billion as of Sept. 27, 2025. Including commercial paper of $2 billion, total debt was $90.51 billion as of Dec. 27, 2025. Apple returned nearly $32 billion in the reported quarter through dividend payouts ($3.9 billion) and share repurchases ($25 billion). These shareholder-friendly initiatives make Apple attractive to investors.

Reasons To Sell:

Stiff competition in the smartphone and PC markets, macro-economic challenges and increasing regulatory hassles are major headwinds.

- Apple shares have underperformed the broader sector in the trailing 12-month. The company is suffering from the uncertainty related to the tariffs and the ongoing trade war between China and the United States. Apple's manufacturing is primarily concentrated in China and it has been taking initiatives to expand manufacturing in other regions including India, Japan, South Korea, Taiwan and Vietnam. We believe the uncertainty over trade war and supply chain constraint will remain an overhang on Apple's prospects in the near term.

- Apple's fortunes are tied to its most important offering, iPhone. The device plays an important role in expanding the iOS ecosystem. However, Apple's excessive dependence on iPhone is a risk to overall growth. The smartphone segment is chock-a-block with attractive devices from Samsung, Xiaomi, Oppo, and Vivo that are intensifying competition for the company. The company has been suffering from sluggish demand for iPhone in China amid increasing competition from the likes of Huawei and Xiaomi as well as lack of Apple Intelligence. Although Apple's newer products like Apple Watch hold significant promise, they are yet to become a force to reckon with like iPhone. Apple is facing stiff competition in the wearables market from Xiaomi, Fitbit, Huawei and Samsung.

- Competition has negatively impacted iPad's growth, with Amazon, Samsung, Microsoft, Hewlett-Packard and others flooding the tablet market. iPad demand has been under pressure due to increasing availability of large-screen smartphones, in addition to stiff competition from Google Chromebooks and Microsoft Surface. Moreover, Apple faces significant competition in the desktop and portable computer segment from the market leader Lenovo and the likes of Hewlett-Packard, Dell, Acer and Asus.

- Apple is facing increasing regulatory hassles related to alleged anticompetitive behavior in the United States and Europe. On Mar. 25, 2024, the European Commission announced that it had opened two formal noncompliance investigations against Apple under the European Union ("EU") Digital Markets Act (the "DMA"). The EU investigation followed the U.S. Department of Justice civil antitrust lawsuit that was filed on March 21. On June 24, 2024, the European Commission announced its preliminary findings and announced that it had opened a third formal investigation against Apple regarding whether the company's new contractual requirements for third-party app developers and app marketplaces may violate the DMA. Apple remains engaged in lawsuits with Fortnite developer Epic Games. This is a major risk as a loss in any of these lawsuits can hurt Apple on both monetary and nonmonetary fronts.

Last Earnings Report

Apple Q1 Earnings Beat Estimates, iPhone Drives Top-Line Growth

FY Quarter Ending	9/30/2025
Earnings Reporting Date	Jan 29, 2026
Sales Surprise	4.32%
EPS Surprise	7.17%
Quarterly EPS	2.84
Annual EPS (TTM)	7.91

Apple reported first-quarter fiscal 2026 GAAP earnings of $2.84 per share, which beat the Zacks Consensus Estimate by 7.17%.

Net sales increased 15.7% year over year to $143.77 billion and beat the Zacks Consensus Estimate by 4.3%. Overall, product sales (79.1% of sales) increased 16.1% year over year to $113.74 billion. Services revenues grew 14% year over year to $30.01 billion and accounted for 20.9% of sales. The figure beat the consensus mark by 1.68%.

Apple's Top Line Rides on Strong iPhone Sales

iPhone sales jumped 23.3% year over year to $85.27 billion and accounted for 59.3% of net sales. iPhone sales benefited from strong shipments of the iPhone 17 family.

iPad sales of $8.6 billion increased 6.3% year over year and accounted for 6% of net sales. The figure beat the Zacks Consensus Estimate by 1.28%.

Mac sales of $8.39 billion decreased 6.7% year over year and accounted for 5.8% of net sales. The figure missed the Zacks Consensus Estimate by 7.54%.

Wearables, Home and Accessories sales decreased 2.2% year over year to $11.49 billion and accounted for 8% of net sales. The figure lagged the consensus mark by 5.72%.

Apple's Q1 Rides on Strong Greater China Sales

Greater China sales jumped 38% year over year to $25.53 billion and accounted for 17.8% of sales. Rest of Asia Pacific sales increased 18% year over year to $12.14 billion and contributed 8.4% of total sales. The company saw double-digit growth in India.

Europe's sales grew 12.7% year over year to $38.15 billion in the reported quarter and accounted for 26.5% of net sales.

Americas' sales were $58.53 billion, up 11.2% year over year and accounted for 40.7% of sales. Japan sales increased 4.7% year over year to $9.41 billion and accounted for 6.5% of sales.

Apple's Gross & Operating Margins Expand Y/Y

The gross margin of 48.2% expanded 130 basis points (bps) on a year-over-year basis. The gross margin expanded 100 bps sequentially, driven by a favorable mix.

Products' gross margin expanded 450 bps sequentially to 40.7% due to a favorable mix. Services' gross margin was 76.5%, up 120 bps sequentially.

Operating expenses rose 19% year over year to $18.38 billion due to a 31.7% increase in research & development expenses and 4.4% growth in selling, general & administrative expenses.

Operating margin expanded 90 bps on a year-over-year basis to 35.4%.

Apple's Balance Sheet Remains Strong

As of Dec. 27, 2025, cash & marketable securities were $144.8 billion compared with term debt of $88.51 billion. Apple had cash & marketable securities worth $132.42 billion compared with term debt of $90.68 billion as of Sept. 27, 2025. Including commercial paper of $2 billion, total debt was $90.51 billion as of Dec. 27, 2025.

Apple returned nearly $32 billion in the reported quarter through dividend payouts ($3.9 billion) and share repurchases ($25 billion).

Apple Offers Positive Q2 Guidance

Apple expects the March quarter's (second-quarter fiscal 2026) net sales to grow between 13% and 16% on a year-over-year basis. Services are expected to grow at the same rate reported in the first quarter of fiscal 2026.

Gross margin is expected to be 48-49% in the second quarter of fiscal 2026. Operating expenses are expected to be between $18.4 billion and $18.7 billion.

Recent News

2026

On Jan. 22, Apple announced that it scored six nominations in total from Academy of Motion Picture Arts and Sciences. The nominations include Best Picture for *F1*, the highest-grossing sports feature of all time, alongside Best Sound, Best Visual Effects, and Best Editing. Documentary *Come See Me in the Good Light* lands a Best Documentary Feature Film nomination, and *The Lost Bus* earns a nomination for Best Visual Effects.

On Jan. 14, Apple announced the launch of *Sid Meier's Civilization VII* Arcade Edition on Feb. 5 to Arcade. The other well-known games joining the service includes *Retrocade*, *Felicity's Door* , and *I Love Hue Too+*.

On Jan. 13, Apple announced Apple Creator Studio, a collection of powerful creative apps on Mac, iPad, and iPhone for creators around the world.

On Jan. 7, Apple and Chase announced that the latter will become the new issuer of Apple Card, with an expected transition in approximately 24 months.

On Jan. 2, Apple announced that beginning Jan. 5, Apple Fitness+ introduces four brand-new workout programs that offer users weekly training plans to help take the guesswork out of how to reach their goals. The Artist Spotlight series launches new workouts with full playlists featuring KAROL G and Apple Music Super Bowl LX Halftime Show superstar Bad Bunny. And this season of Time to Walk features new episodes with Penn Badgley, Mel B, and Michelle Monaghan.

2025

On Dec. 8, Apple announced that Apple Fitness+ is expanding to 28 new markets — including Chile, Hong Kong, India, the Netherlands, Singapore, Taiwan, and more — on December 15, with Japan launching early next year.

Apple also announced that it expanded its Apple Manufacturing Academy with new virtual programming as a part of the company's $600 billion in the U.S. economy over the next four years.

On Oct. 17, Apple and Formula 1 announced a five-year partnership under which all F1 races will be exclusively available on Apple TV in the United States beginning next year.

On Oct. 16, Apple and NBCUniversal are set to introduce the Apple TV and Peacock bundle from Oct. 20.

On Oct. 15, Apple introduced the new iPad Pro and MacBook Pro both powered by the M5 chip. The company also upgraded Vision Pro with the M5 chip and dual knit band.

On Oct. 10, Apple announced that Spectrum SportsNet will offer NBA games in Apple Immersive on Apple Vision Pro, with a selection of live Los Angeles Lakers matchups during the 2025-26 season.

On Oct. 7, Apple announced that Football Manager 26 Touch will return to Apple Arcade on Nov. 4. Football Manager 26 Touch by Sports Interactive and SEGA introduces an upgraded graphics engine that brings smoother player movement and incredible on-pitch detail to life, official Premier League licenses, and women's football for the first time in series history.

On Sept. 23, Apple announced the launch of NBA 2K26 Arcade Edition in October.

On Sept. 16, Apple's free app for iPhone – Apple Sports – is expected to gain traction with the launch of widgets for iPhone, iPad, and Mac. The service is now available for free in eight additional countries.

On Sept. 15, Apple updated its software platforms with the launch of iOS 26, iPadOS 26, macOS Tahoe, watchOS 26, visionOS 26and tvOS 26. The company also announced new Apple Intelligence features including Live Translation in Messages, FaceTime, Phone, and with AirPods, updates to visual intelligence, among other features.

On July 21, Apple announced the expansion of Apple Retail into the Kingdom of Saudi Arabia with the launch of the Apple Store online and Apple Store app.

On July 17, Apple announced special crossover events featuring SpongeBob SquarePants in Snake.io+ and Crossy Road Castle, available exclusively on Apple Arcade.

Apple News+ debuted Emoji Game, an original puzzle that challenges subscribers to use emoji to complete short phrases. The game is now available in English for Apple News+ subscribers in the U.S. and Canada.

On July 15, Apple streaming service Apple TV+ earned a record-breaking 81 Emmy Award nominations across 14 hit Apple Original titles for this year's 77th Emmy Awards. *Severance* became this year's most-nominated series with 27 nominations, and *The Studio* made history as the most-nominated freshman comedy series with 23 nominations in total.

Valuation

Apple shares are up 32.8% in the past six-months period and 16% over the trailing 12-month period. Stocks in the Zacks sub-industry and the Zacks Computer & Technology sector are up 26.1% and 14.6% in the past six-months period, respectively. Over the past year, the Zacks sub-industry and the sector are up 11% and 24.9%, respectively.

The S&P 500 index has appreciated 12.5% in the past six-months period and 17.2% in the past year.

The stock is currently trading at 31.24X forward 12-month earnings, which compares to 28.67X for the Zacks sub-industry, 26.84X for the Zacks sector and 23.24X for the S&P 500 index.

Over the past five years, the stock has traded as high as 34.93X and as low as 19.78X, with a 5-year median of 27.22X. Our Neutral recommendation indicates that the stock will perform in line with the market. Our $284 price target reflects 32.8X forward 12-month earnings.

Zacks Stock Rating System

We offer two rating systems that take into account investors' holding horizons: Zacks Rank and Zacks Recommendation. Each provides valuable insights into the future profitability of the stock and can be used separately or in combination with each other depending on your investment style.

Zacks Recommendation

The Zacks Recommendation aims to predict performance over the next 6 to 12 months. The foundation for the quantitatively determined Zacks Recommendation is trends in the company's estimate revisions and earnings outlook. The Zacks Recommendation is broken down into 3 Levels; Outperform, Neutral and Underperform. Unlike many Wall Street firms, we have an excellent balance between the number of Outperform and Neutral recommendations. Our team of 70 analysts are fully versed in the benefits of earnings estimate revisions and how that is harnessed through the Zacks quantitative rating system. But we have given our analysts the ability to override the Zacks Recommendation for the 1200 stocks that they follow. The reason for the analyst over-rides is that there are often factors such as valuation, industry conditions and management effectiveness that a trained investment professional can spot better than a quantitative model.

Zacks Rank

The Zacks Rank is our short-term rating system that is most effective over the one- to three-month holding horizon. The underlying driver for the quantitatively-determined Zacks Rank is the same as the Zacks Recommendation, and reflects trends in earnings estimate revisions.

Zacks Style Scores

The Zacks Style Score is as a complementary indicator to the Zacks rating system, giving investors a way to focus on the highest rated stocks that best fit their own stock picking preferences.

Academic research has proven that stocks with the best Value, Growth and Momentum characteristics outperform the market. The Zacks Style Scores rate stocks on each of these individual styles and assigns a rating of A, B, C, D and F. We also produce the VGM Score (V for Value, G for Growth and M for Momentum), which combines the weighted average of the individual Style Scores into one score. This is perfectly suited for those who want their stocks to have the best scores across the board.

Value Score	D
Growth Score	A
Momentum Score	A
VGM Score	B

As an investor, you want to buy stocks with the highest probability of success. That means buying stocks with a Zacks Recommendation of Outperform, which also has a Style Score of an A or a B.

Disclosures
